

Moodle platform

Prepared by ZS10

http://moodle.droneteamproject.eu/

The screenshot shows the Moodle website header with the 'DRONE TEAM' logo on the left and 'DRONETEAM ELEARNING' on a green background on the right. Below the header is a large banner image of drone components. Underneath the banner are four course cards:

- Basic Drone Assembly**: Assembling the drone components needed to fly. Includes a 'READ MORE' button.
- Advanced Drone Assembly**: Assembling GPS, Barometer, Telemetry, First Person View, etc. Includes a 'READ MORE' button.
- Drone Team Glossary**: Learn all drone vocabulary you will need to know. Includes a 'READ MORE' button.
- How to Fly a Drone**: Learn all about configuration and how to use Mission Planner. Includes a 'READ MORE' button.

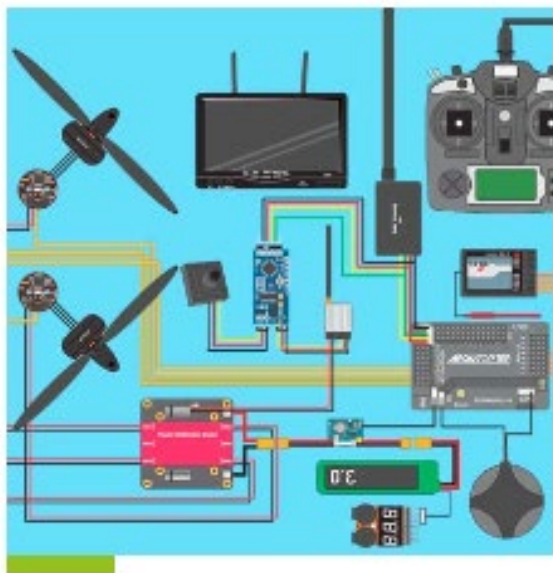

Main part

- The moodle courses cover all Intellectual Outputs:
 - Drone components
 - Basic Drone Assembly (O1,O2,O3)
 - Advance Drone Assembly (O4,O5,O6,O7,O8)
- In addition:
 - English glossary
 - How to flight a drone

Drone components

Drone Components

Learn everything you need to know
for each component

Learning Everything About Drone Components

You will learn about all components of a drone and its function. It will specify which components are essential for the drone to fly (basic drone) and which components are advanced that will improve the flight experience as well as its safety.

Części drona (kurs w języku polskim)

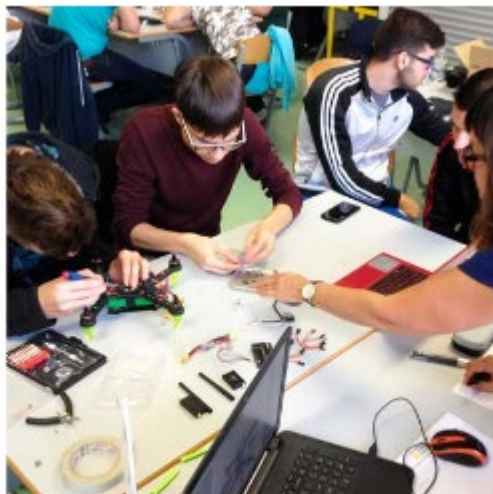

Kurs o wszystkich elementach drona i jego funkcji. Określa, które elementy są niezbędne do pilotowania drona (podstawowy dron) i które elementy są zaawansowane, co poprawi jakość lotu oraz jego bezpieczeństwo.

The list of components with description prepared by AIJU.

Can be translated to native languages

Basic drone assembly

Basic Drone Assembly

Assembling the drone components
needed to fly

The tutorial how to assembly
the basic drone with CC3D flight
controller. You can find the film
there how to do it.

(Prepared by AIJU)

Advanced Drone Assembly

Advanced Drone Assembly

Assembling GPS, Barometer,
Telemetry, First Person View, etc.

Prepared by AIJU advanced course about other components. You can find there information about GPS, barometer, telemetry, First Person View.

Drone Team Glossary

Drone Team Glossary

Learn all drone vocabulary you will need to know

Assembling GPS, Barometer, Telemetry, First Person View, etc.

How to fly a drone

How to Fly a Drone

Learn all about configuration and
how to use Mission Planner

The set of courses connected with the law and program Mission Planner. All you need to learn flying with drone.

The courses are prepared by partners of Drone Team

The law

- Each country has its own regulation. We propose to create a short courses in native language for people in Spain, Croatia, Slovenia and Poland.

Mission planning

- There is a course about mission planning in english and polish language.

Mission Planning	↩
Planowanie lotu (Mission planning)	↩
Training in Slovenia	↩
Prawo lotnicze a latanie dronem (Kurs w języku polskim) (The flight law)	↩
